SynoGate

Accelerate Your FPGA Deployment

Expert Design for Next-Gen Applications:

- Network Acceleration: Boost speed, efficiency, and security

- Vision Systems: Camera, image processing, recognition, and detection

- AI & Edge Security: Intelligent solutions for IoT, Industry 4.0 and beyond

- Aviation and Space applications

- Broadcasting & Media: High-resolution streaming and more

- Legacy System Integration: Seamless retro-fitting and sensor integration

Partner with us to unlock your FPGA potential.

Contact us to discuss your project needs.

Synogate is a Berlin-based company for RTL-design and FPGA development. With expertise in software development, computer graphics, deep learning, cryptography and more to deliver custom solutions and IP-cores. We developed hardware components for cybersecurity that have been approved by the German Office for Information Security (BSI) and in use by the German Federal Government.
